Electric

The Ilektra range, presented by Paul Agnew Designs, demonstrates the perfect balance between thoughtful design and state-of-the-art technology.

Championing expression and individuality whilst also prioritising simplicity and functionality, the Ilektra range offers a host of options to enable you to turn your electric fireplace into the statement piece of your home.

With single-sided, double-sided and triple-sided glass options available for every model, our eco-compliant Ilektra range allows you the flexibility to express your style, your way.

All models are equipped with a standard electric plug fitting (240V/10A), making installation simple and hassle free.

ilektra™

electric fire

Let the tech do the talking with the iLéktró 1250.

Beauty, style and luxury are just some of the features offered by iLéktró.

With an iLéktró fireplace, practicality is equally important.

All models in our range utilise adaptive heating technology and include an RF touchpad remote control and a 7-day programmable timer with room thermostat, enabling you to maintain the perfect temperature in your home with ease.

electric fire

Heat the rooms in your home with the iLéktra 950 Aspect.

The products in our iLéktra range have been designed with you in mind.

After all, a fireplace shouldn't just make your home look more inviting – it should make your home feel more inviting too.

With patented technology which guarantees even heat distribution built into all models, you can personalise your iLéktra fireplace to create the perfect ambience by controlling both the visuals and the temperature.
